Scholarship and Research

Publishing scholarship in an open access journal often involves paying an article processing fee (APC) to the publisher. To help offset these fees, U of I Library runs an **Open Access Publishing Fund (OAPF)**.

Each fall and spring semester, U of I faculty, staff, and graduate students can apply for an OAPF award to help cover their recently published open access article.

General eligibility requirements:

- Applicant must have current affiliation with the University of Idaho
- Article must be accepted to a fully open access journal—find qualifying journals in the Directory of Open Journals (DOAJ)
- Invoice/receipt date must fall within the current funding period
 - **FALL:** July 1 - December 31
 - **SPRING:** January 1 - June 16

OAPF awards are available on a first-come, first-served basis.

Teaching and Learning

Using open materials for your required classroom readings helps save students money, improves access to materials, while also allowing you to customize content to meet your teaching goals.

The Library can support you in:

- Identifying existing openly licensed resources that can be used immediately
- Customizing existing materials
- Creating brand new resources that can be shared and used on platforms like our OERCommons.org hub.

Getting started:

- Open at Uldaho Pressbooks - All about Open at the University of Idaho
- Choosing [Course Materials Cheat Sheet Link](#)

Digital Publishing

The University of Idaho supports innovative digital publishing projects across a variety of platforms. Faculty can work with us to publish on a variety of platforms using:

- Pressbooks - create high quality digital textbooks and monographs
- CollectionBuilder and/or the Library's LibStatic approach - custom digital collections and infrastructure
- Fully custom creations - we are always publishing innovative faculty content.

We also support new media content with our recent expansion into support for Podcasting recording and publishing.

Getting started:

- Have a digital project idea? Reach out to:

 - Open Access publishing fund, Pressbooks, and Podcasting

6 Questions About Open

- **Why bother publishing and utilizing open access texts?**
 - In a 2023 survey that over 1,000 Vandals responded to:
 - 60% reported experiencing challenges in affording living expenses while at UI
 - 47% reported not purchasing a required course material because they could not afford it
 - 86% reported purchasing a required course material for a class and not using it

For some students, even a \$10 difference can determine if they can actually afford to purchase a text.

- ***Do I have to create my own resources to use OERs?***
 - *No! We can help you finding existing resources that can work as-is, which can help save you time while expanding your curriculum. We can also identify remixable resources, allowing you to lightly customize content.*

6 Questions About Open

- **What's your biggest challenge when it comes to ditching high cost textbooks?**
 - Whatever the challenge, the Library can help! From finding existing resources, supporting you in creating something new, to creating customized features like interactive digital textbooks, the Library is ready to help you find the perfect balance of high quality curriculum and affordability.
 - Don't forget we also offer digital course reserves, where we can use library licenses to provide students access to traditional, for-profit texts.
- **How does open access affect copyright?**
 - Copyright for an open access work depends on the license selected and any associated publishing agreements. In general, you maintain copyright over the work and select an open license allowing others to reuse/remix it. However, publishing agreements may involve turning your copyright over to the publisher and allowing them to choose the open license. You can visit the [U of I Copyright Guide](#) to learn about open licenses and managing your author rights.

6 Questions About Open

- **Are open access journals lower quality?**
 - Open Access journals, just like for profit journals, run the spectrum in quality. Many prestigious journals now publish in open or hybrid open formats.
- **Why do I have to pay to publish in open journals? I thought that was a bad thing?**
 - In traditional academic publishing, editorial, production, and hosting costs are covered by subscription fees. To make articles open access, some publishers shift these costs from the reader onto the author in the form of article processing charges (APCs). Charging APCs for accepted articles does not automatically make a journal predatory. However, be wary of publishers that expect payment at the time of submission.
